

Phase III Replacement Sequence

The Technology Replacement Task Force (TRTF) recently worked on determining the sequence of future deployment and set the next phase of deployment, which is below. All employees are encouraged to attend the training sessions, "New Computer Basics", to learn how to back up all AC related files, folders, and favorites before the new computer arrives. Also, the media for any special software that must be loaded on the new computer must be available upon delivery, along with a copy of the software license. ITS will call the supervisors of each area to schedule the replacement. As Phase II nears completion, the TRTF will determine the sequence of deployment for Phase III.

Phase III Deployment Sequence –End of March 2009

1. Byrd Business Building-
2. Parcels
3. West Campus (all)
