 Person Responsible: Virginia R. Gass

Planning and Evaluation Tracking

Purpose Statement: (give a brief “statement of purpose” for the program): To provide a program of study to prepare students to perform basic occupational therapy skills and procedures in any facility that utilizes occupational therapy. These skills and procedures must be practiced under the supervision of a registered occupational therapist (OTR). 2002-2003

Goal Statements	Assessment Tools/Standards	Results	Use of Results/Revisions
<p>1. 100% of graduates will become professional to establish therapeutic relationships with clients and staff, exhibiting confidentiality, being a team member, demonstrating self-efficacy, accepting supervision, and developing a positive, professional self-image</p> <p>2. Demonstrate knowledge and skills in instructing and adapting selective life tasks and purposeful activities to meet specific needs of individual clients in conjunction with health care team members and under the supervision of a registered occupational therapist (OTR) with at least 75% proficiency.</p> <p>3. be cognizant of the safety precautions and treatment indicators when choosing and implementing treatment activities and modalities for clients in any OT facility with a grade of 75 or better.</p>	<p>1. Final course grades, clinical, grades, certification exam results, job placement rates, and employer satisfaction.</p> <p>2. Lab practical grades, final course grade sheets, clinical grade sheets, certification exam results</p> <p>3. Lab practicals, final course grades, practicum grades both Level I and II, certification exam results, job placement rates, employer satisfaction</p>	<p>1. 100% of students were successful in acquiring and maintaining the role of a professional therapy assistant.</p> <p>2. Grade sheets and final examination results determine that students have made and surpassed the 75% passing rate or the course will be repeated. 100% of students successfully passed courses and the certification exam with 75% or better.</p> <p>3. 100% of students enrolled successfully complete all requirements with a grade of 75 or better.</p>	<p>1. If students are not successful, curriculum will be revised, more clinical and coursework will be done to emphasize the professional aspects of the degree program, and more effort will be spent to create a professional atmosphere for students.</p> <p>2. Curriculum will be revised if grades are no longer acceptable or % drop or if students are no longer being successful and cannot perform in clinical experiences.</p> <p>3. Curriculum will be revised if students are not successful, more work will be done with clinical supervisors in the areas of practical applications of skills, and courses will be altered to assure information and skills are assimilated, understood, and practiced.</p>
