Person Responsible: Bill Crawford

Planning and Evaluation Tracking

Purpose Statement: The radiography program is committed to provide entry level radiographers to the community that have completed a educational curriculum that complies with all Joint Review Committee on Education in Radiologic Technology accreditation requirements as well as other governing bodies. *(revised February 14, 2007)*

Goal Statements	Objective/Outcome	Results	Use of Results/Revisions
<i>(revised February 14, 2007)</i> 1. Student completion of program by completing a comprehensive exit exam that demonstrates preparedness for the national American Registry of Radiologic Technologist.	<i>(revised February 14, 2007)</i> 1a. After successful completion of all RADR courses 70% of all students who begin the program will be able to function in the clinical environment as indicated by a score of no than 75 on the written capstone exam and completion of all required competencies in the clinical setting as evaluated by a clinical instructor. 1b. Eligible students will complete the national ARRT exam within 1 year of completion of the program with a 85% success rate on the first attempt.	77% of the 2007 graduates have met this objective. 91% of the eligible graduates successfully passed the ARRT examination on the first attempt.	Based on the results the faculty will continue to closely monitor objective 1a. No revisions are necessary at this time. Based on the results the faculty will continue to closely monitor objective 1b. Revisions to RADR course didactic content are updated when such revisions are mandated by the American Society of Radiologic Technologists.
<i>(revised February 14, 2007)</i> 2. Continually provide up-to-date didactic courses and instruction to provide skills and knowledge needed for entry level radiographers as defined by ASRT and ARRT.	<i>(revised February 14, 2007)</i> 2a. Every graduate will be able to perform, at entry level standards, 100% of all skills demonstrated on their competency card after successful completion of all RADR practicum courses. 2b. entry level mastery of skills will be evaluated using an "employer survey of graduate performance" tool to be administered to employers during the first six months following completion of the program.	100% of the 2007 graduates were able to meet objective 2a. Results from the 2007 employers survey are not yet available.	Based on the results the faculty will continue to closely monitor objective 2a. No revisions are necessary at this time. In progress. Will update when data is available. Anticipated update will be in April, 2008.
