Josh, Craig--happy day. We are looking for a room large enough for a massage table and room to work around it that is private as a quiet environment is part of the massage effectiveness. Once you have a good location, we will need a schedule when that room(s) is available. Some of the students work days and others don't so we should be able to accommodate several massages a week or more. If there are two rooms that would be even better. Let me know and we will start setting up on the West Campus side on how to enlist clients (free) for a 90 minute massage.

Thanks Trent, Josh, and Craig....we may be setting up a tradition that win-win that provides a safe and appropriate setting for the students work. Have a great day.

I love the idea and yes I think that would be very feasible with space in the fitness center. I would contact either Josh Blashill or Craig Clifton as they would be able to identify the space availability within the fitness center better than I could. Please let me know what they say back to you.

Morning Trent--hope the lovely weather is good for you!!

I am teaching A&P in the Massage Therapy Course this term. There are 8 students who need to do 30 practice massages each. The rub is that must do it on their own time and location. As you can imagine, most do not have a good place to do these 90 minute massages. I was wondering--is there a place at the gym that can be a massage room for one student and client at a time? Then we could advertise they are available and students/staff etc...can schedule with each student. They would be able to do odd hours/weekends. It could be a win-win.

What do you think?

Is this through the massage therapy program? I think about liability if not? But all for it if we can make it work.

Best, Toni

Anne,

Yes. We would love to host this!!! We have two rooms that could be used for this, CFC 106A and 106B. 106A is our current relaxation room and 106B is right next to it. How many days and what dates did you have in mind to do this?

We could start as early as next week. What hours do you think would work the best? There is 240ish massages to be done so I would guess 28 Oct to end of term at the very least. I will chat with Health Sciences and the Massage students and let you know ASAP. Great solutions for all. Maybe we can even have the student paper do a story. THANKS

Only AC Massage Therapy students who have been released to begin their practice sets (thus free)--they must do 90 minutes on each person. They will bring their own massage table and sheets each time. I will get you names and available dates after I review all with Melissa Burns (Health Science Continuing Ed). I will make a brochure too like the dental student do. Much appreciate your help.

Anne,
One other question. I assumed that AC Massage Therapy students would be doing the massages. Who would be doing the massages? If not AC students, we may need to get further approval.

Craig, students are excited. They each have to do 30 before the end of January--so we will shoot for two students a day for two massages each.

I am working on the schedule and the students are working on a way to communicate with interested folks. More as I have it. They do want to start next week. Thanks again!!
