

Justification for Postponing the Diesel Technology Program Advisory Board Meeting

Amarillo College's Diesel Technology program typically holds at least one advisory board meeting annually, as required. However, due to a comprehensive, large-scale program revision currently underway, we have postponed this year's meeting.

This in-depth revision includes a thorough review and update of the program's learning outcomes, lab exercises, assessments, homework assignments, and overall scope and sequence. Our goal is to ensure that the curriculum remains aligned with current industry standards and continues to meet the evolving needs of our students and employer partners.

By completing the revision prior to convening the advisory board, we aim to present a fully developed and thoughtful proposal that allows for more meaningful input, targeted feedback, and strategic alignment. The updated curriculum will serve as a more effective foundation for discussion and decision-making.

We are committed to maintaining strong industry engagement and plan to reconvene the advisory board promptly upon completion of the revision process.
