

Download Mozilla Firefox

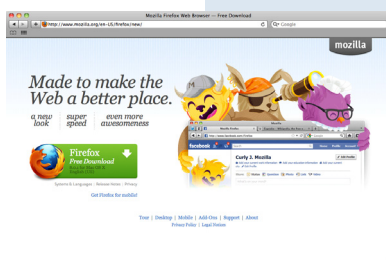

for your Apple

What is Mozilla Firefox?

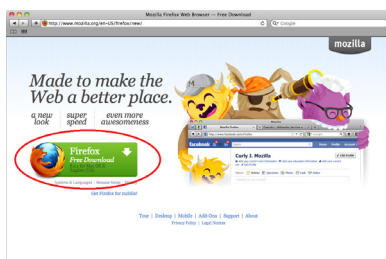

Mozilla Firefox is an internet browser. Other common internet browsers that you may be familiar with are Internet Explorer and Google Chrome.

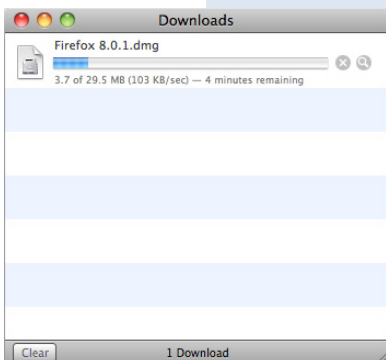

Though your computer is likely to already have an internet browser, it is a good idea to have more than one installed. There are instances when a specific site shows or works incorrectly in one browser, but works well in another.

1. In a web browser, navigate to www.mozilla.org/firefox.

2. Click the button labeled “Firefox Free Download”.

3. Wait as the file is downloaded.

Download Mozilla Firefox

for your Apple

4. After download completes, drag the Firefox icon to the Applications folder.

5. Open the Applications folder. Firefox should now be installed.

Note: If you would like a shortcut to Firefox to appear in your Application bar, drag the icon from the Applications folder and drop it on the Applications bar.
