

Still use the original Presets for work lights.

1 & 2 will have Overhead and house lights on full

3 & 4 will have the above and some face light added

Steps (The screen is locked so no one can erase or change the cues that are saved)

- 1) Make sure the original Presets are off
- 2) Push the Blue Button – the board will come on and should be on the Cue List. If not, touch “Controls” then touch “Cue List”
- 3) Slide the Cue fader all the way up (the button below will turn yellow) and you will be in Cue 1.
- 4) Push the Blue button to go to the next cue or you can push the button under the Reverse symbol to go back one cue.
- 5) When finished slide the Cue fader down all the way (all lights onstage should go off)
- 6) Push and hold the Power Button until you see “Shutdown/Hibernate” on the screen.
- 7) Push the button under “Proceed”
